

WE'RE LOOKING
FOR SUPPORT

We are hiring

For our headquarters located near the border
in Grevenmacher, Luxembourg

R&D Laboratory Technician (m/f/d)

Your tasks:

- Conducting tests with new or alternative raw materials
- Further development of existing ink series
- Developing new products as part of R&D projects
- Resolving technical customer issues in the laboratory and on-site at customer premises
- Conducting material and performance testing of printing inks

Your profile:

- You have successfully completed vocational training as a chemical laboratory technician, coatings laboratory technician, chemical production technician, or chemical-technical assistant (CTA)
- You work carefully and in a customer-oriented manner, with strong comprehension skills and a willingness and ability to learn

What we offer:

- Modern, ergonomic, and safe workplaces
- Involvement in optimizing your own workspace
- Free access to a fitness studio
- Complimentary coffee and water
- Professional development and training opportunities

We love ink!

DONECK EUROFLEX S.A. is an innovative, medium-sized manufacturer of printing inks.

As a strong partner and solution provider, we integrate sustainability and teamwork into our core processes, our decision-making, and our products.

Have we sparked your interest? ?

Then please send us your application documents to:
jobs@doneck.com.

We're looking forward to meeting you!
